

# EKYFLEX MOBILITY

## Joint flexibility

### Nutritional supplement for horses monitored for joint stiffness.

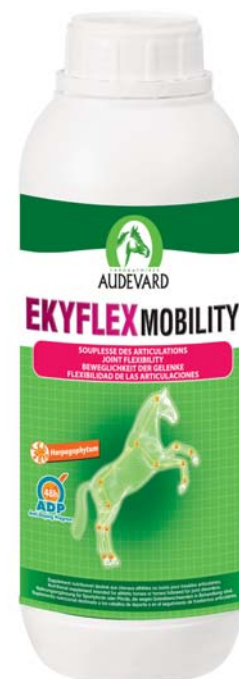

Specially formulated by veterinarians at Audevard Laboratories, EKYFLEX MOBILITY provides a true solution for joint care in horses.

EKYFLEX MOBILITY provides dual action on affected joints:

- **Joint suppleness:** active elements as an effective accompaniment in treatments for joint pain and stiffness.
  - Active herbal ingredients: Devil's Claw (Harpagophytum), Horsetail (Equisetum arvense) and Chrysanthellum, known for their soothing action.
  - Hyaluronic acid: Hyaluronic acid is a substance that is naturally present in joints and which has proven lubrication and anti-inflammatory effects.
- **Protection of the soft tissue surrounding the joint:** antioxidant effects of Vitamin C

### Uses :

- Support for horses with joint fragility.
- Support for joints under strain.
- Support for joints in elderly horses.

### Composition per 1L

|                 |       |                |      |           |     |
|-----------------|-------|----------------|------|-----------|-----|
| Harpagophytum   | 25 g  | Chrysanthellum | 25 g | Horsetail | 5 g |
| Hyaluronic acid | 0,5 g | Vitamin C      | 10 g |           |     |

### Directions for use:

Horses: 30ml (1 oz.) of EKYFLEX MOBILITY per day for one month, mixed with the regular feed or orally. May be administered all year-round or regularly. The quantity can be adjusted according to the horse's joint profile, weight and activity. Ask your veterinarian for advice.
