

MYOSTEM MASS

Muscle development and weight building

Feed supplement to stimulate muscle development and weight building.

Properties:

- Very concentrated in essential amino acids.
- Optimal assimilation: enriched with BIO-MOS® and Fenugreek.

The concentrated intake in essential amino acids has been set according to the ideal protein profile of the horse's muscle. This formula helps increase protein synthesis and develop muscle mass.

Fenugreek stimulates the appetite while BIO-MOS® is a prebiotic that contributes to optimising assimilation of the ration.

Total intake in essential amino acids / 100 g

Lysine	5,3 g	Arginine	4,5 g	Methionine	1,4 g
Phenylalanine	4,1 g	Histidine	2,3 g	Valine	4 g
Leucine	6,8 g	Isoleucine	3,5 g	Threonine	3,9 g

Indications:

- Training
- Young horses during growth
- Convalescence / Old age
- Weight building

Directions for use:

Administer for a minimum of 3 weeks.

- Adult horses: 100 g per day. (1 measuring scoop = 40g)
- Young horses: 50 g per day.

For best results, administer following exercise while ensuring adequate carbohydrate intake (grains).

Development - Nutrigenomics - Audevard
www.audevard.com

Nutrigenomics have demonstrated that certain nutrients are able to affect gene expression. This new scientific discipline renders Audevard products even more efficient, safe and horse-friendly.

Product analysed by the Horse Racing Laboratory (Laboratoire des Courses Hippiques - LCH) in the context of Audevard Anti-Doping Program. Protocol details at www.audevard.com
